What is a “Fume Event” or “Smoke Event”?

OACI : Cir 344-AN/202

- **Fume(s).** Odorous, gaseous compounds which are not visible.
Note. — In the context of this circular, fumes and odours are deemed to be synonymous, and the term “fume(s)” includes both fumes and odours.
- **Smoke.** The product of burning materials made visible by the presence of small particles.

FAA : SAFO 18003 (Safety Alert For Operators)

- Inflight odor, smoke and/or fume events can occur without overt visual and/or olfactory cues. To mitigate adverse health consequences to passengers and crew, prompt and decisive action is critical.
